

## **Project Scientist – Insect Endocrinology Research**

### **University of California, Riverside**

The Yamanaka lab in the Department of Entomology is recruiting a Project Scientist who will work on research projects related to hormonal signaling in the fruit fly and other insect species. The position is available September 1, 2017. A strong background (i.e. multiple publications in top-tier journals in the field) in insect endocrinology research, more specifically that of ecdysone and/or insulin/IGF signaling, as well as experience and expertise in fruit fly genetics is required. Applicants must have at least 5 years of postdoctoral training at the start date of the position. The candidate also needs to have substantial experience in *Drosophila melanogaster* genetics research for more than 5 years. To apply please submit a curriculum vitae, statement of research and 3 references- contact information only to AP RECRUIT:

<https://aprecruit.ucr.edu/apply/JPF00744>. Review of applications will begin May 2, 2017 but the position will remain open until filled.

Information about the Entomology Department and the position can be found at:  
<http://www.entomology.ucr.edu>.

UCR is a world-class research university with an exceptionally diverse undergraduate student body. Its mission is explicitly linked to providing routes to educational success for underrepresented and first-generation college students. A commitment to this mission is a preferred qualification.

The University of California is an Equal Opportunity / Affirmative Action Employer with a strong institutional commitment to the achievement of excellence and diversity among its faculty and staff. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, protected veteran status, or any other characteristic protected by law.
