

Spring Quarter 2007-2008 ENT 250

March 31	No seminar		
April 7	Anne Nielsen	Beating around the bush: Investigations on the population ecology of the non-native Brown Marmorated Stink Bug	Trumble
April 14	No seminar		
April 21	Xin-geng Wang	Optimal patch exploitation by insect parasitoids: implications for biological control	Trumble
April 24	Luis Teixeira	Adaptation and phenotypic plasticity in <i>Rhagoletis</i> fruit flies (Diptera: Tephritidae)	Trumble
April 28	Matt Daugherty	Predicting the impact of an invasive vector: from sharpshooter transmission ecology to Pierce's disease dynamics	Trumble
May 5	Marjorie Hoy Dept. Entomol./Nematol. Univ. Florida	Genome Analyses of the Predatory Mite <i>Metaseiulus occidentalis</i> : Mitey Small and Mitey Large	Henke (2-3918)
May 12	John Reese Dept. Entomology Kansas State University	Aphid-Plant Interactions: Molecular Genetics and Feeding Behavior	Walker (2-5808)
May 19	Molly Hunter Dept. Entomology Univ. Arizona	Bacterial symbionts in insect host-parasitoid interactions	Henke (2-3918)
May 26	HOLIDAY: no seminar		
June 2	Yves Carriere Dept. Entomology Univ. Arizona	Interactions between insects and transgenic plants	Miller (2-2278)
