

Entomology Seminar Schedule Winter 2009**3/10/2009 8:21 AM**

Date	Speaker	Title	Host
Jan 5	Patricia V. Pietrantonio Department of Entomology Texas A&M University	G protein-coupled receptors in ticks and mosquitoes as potential targets for pesticide discovery	Beckage 2-3521
Jan 12	Gonzalo Giribet Harvard University, Museum of Comparative Zoology	Assembling the Animal Tree of Life: Approaches from morphology and phylogenomics	Heraty 2-6351
Jan 19	HOLIDAY: no seminar		
Jan 26	Elaine Backus USDA-ARS, Kearney Agricultural Research Center, Parlier, California	Transmission mechanisms of <i>Xylella fastidiosa</i> by the glassy-winged sharpshooter, and implications for disease epidemiology	Walker (2-5808)
Feb 2	Sara Cherry University of Pennsylvania School of Medicine, Philadelphia	Identification of host factors involved in viral replication	Ray (2-5998)
Feb 9	Mark Stopfer Neuroscience, NIH	Spatiotemporal neural codes for sensory stimuli	Ray (2-5998)
Feb 16	HOLIDAY: no seminar		
Feb 23	Heather Proctor Dept. Biological Sciences University of Alberta	Parasites, predators, and prey: the origin and ecology of water mites (Acari: Hydrachnidia)	Mullens (2-5800)
Mar 2	Tom Baker Department of Entomology Pennsylvania State Univ.	But Do We Shoot the Driver? Meeting New Challenges in Detecting Agents of Harm by Using Old Entomological Knowledge	Adams (2-4746)
Mar 9	Marlene Zuk Dept of Biology UCR	Rapid evolution in silence: adaptive signal loss in the Pacific field cricket	Walker (2-5808)
