

The Conference will be at the same location as the Urban Conference, the University Extension Center located near the UC Riverside campus. See the other side of this flier for driving and parking directions.

Purpose

The goals of the meeting are to learn about IPM ant control programs, issues related to pesticide runoff, and new pesticide regulations that affect the industry.

Topics

Learn about a new invasive ant pest, changes in pesticides used, pesticide runoff as an urban problem, the regulation of pesticides to prevent runoff, and examples of IPM for ant control as done by Pest Management Professionals..

Educational Credits

Expected credits being offered by the California Structural Pest Control Board, California Department of Pesticide Regulation are:

SPCB

- Rules & Regs
- IPM –
- Branch 2 Technical –

CDPR

- Laws and Regs –
- Other –

Sign in at the credentials table with your license number in order to receive credits. A SPCB-required test will be given at the end of the conference for CEU credits.

Wednesday, March 21, 2012

- 8:00 **Registration**
8:30 **Welcome**
Les Greenberg, Specialist, Department of Entomology, UC Riverside
- 8:40 **Understanding the ecology, biology, and management of rover ants in the Southwest**
Paul B. Baker, Extension Specialist, University of Arizona, Tucson, Arizona
- 9:10 **Change in pesticides since 1990: Comparing pesticide actives, toxicity, and inerts from 1990, 2000, and 2010**
Keith Willingham, Vice President Technical Services, Western Exterminator Company
- 9:40 **Pesticide pollutants from urban landscapes: Why landscape runoff matters**
Lorence R. Oki, CE Assistant Specialist, Landscape Horticulture, Department of Plant Sciences, University of California, Davis
- 10:10 **Break**
10:25 **Pesticide residues in wash off water from residential hardscapes**
Darren L. Haver, Water Resources/Water Quality Advisor and South Coast REC Director, Interim County Director, University of California Cooperative Extension, Orange Co.
- 10:55 **Recent developments in the regulation of pesticides and pest management to protect surface water quality in urban areas**
David Tamayo, Environmental Specialist, Sacramento County Stormwater Program
- 11:25 **Using your smart phone to take close-up pictures of ants**
Dong-Hwan Choe, Assistant Professor, Department of Entomology, University of California, Riverside
- 11:45 **Lunch on your own**
- 1:00 **New regulations and label changes: What does it mean to me?**
Darren van Steenwyk, Technical Director at Clark Pest Control, Modesto, CA
- 1:30 **Elements of success: Low-impact pest management**
Patrick T. Copps, Technical Manager, Orkin Pacific Division, Costa Mesa, CA
- 2:00 **Understanding and implementing GreenPro IPM standards to work for your company**
Darren van Steenwyk, Technical Director at Clark Pest Control, Modesto, CA
- 2:30 **Questions and comments to speakers**
3:00 **Exam for structural pest control**
