8) Describe any damage observed: _____

9) How long has this insect been present: _____

10) Other comments: _____

Please pack specimens as follows: Pack **dead** insects in a sealed plastic bag inside a small box or other container to protect from smashing. Insects may be placed in a sealed container in a freezer overnight to kill. **Do NOT** bring or send live specimens collected outside of Riverside, CA. Small, soft-bodied insects or caterpillars can be placed in a small watertight container with 70% rubbing alcohol or ethanol. Pack container inside a plastic bag before transporting. Mail or bring sample to INSECT I.D. at the above address. Note that USPS has special regulations involving mailing of specimens in alcohol. **Specimens will not be returned.**
