# ENTOMOLOGY

---

## AT THE UNIVERSITY OF CALIFORNIA, RIVERSIDE

[ENTOMOLOGY.UCR.EDU](http://ENTOMOLOGY.UCR.EDU)

**Growing great science**  
**Making new discoveries**  
**Building great minds**

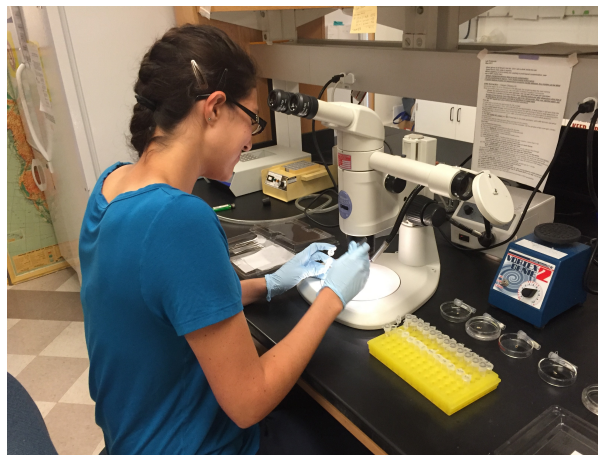

- Entomology is an exciting multidisciplinary science that focuses on insects and their relationship to other organisms, man, and the environment. Insects impact our health our food and our environment.
- One of the world's best entomology programs taught by distinguished faculty conducting pioneering research in the field. Ranked in the two top programs world-wide
- Only entomology program to offer a combined undergraduate and research master's degree
- Opportunities for research
- Opportunities for outreach

**DEGREE PATHS**

- Bachelor of Science (4 years)
- Bachelor of Arts (4 years)
- Master of Science (4+1 years)

The B.S. degree offers students with a strong interest in the natural sciences an opportunity to emphasize this aspect of their education.

A combined B.S. and M.S. (4+1) program is available to motivated students with advanced academic standing. For more information contact Erin Wilson-Rankin ([erin.rankin@ucr.edu](mailto:erin.rankin@ucr.edu))

**CAREER PATHS**

Agricultural sciences, bioinformatics, computational entomology, medical and veterinary sciences, museum sciences, medical sciences, pest and vector control, government agencies, teaching degrees, advanced graduate studies.
